

ALBERT G. NASIBULIN

Ph.D., Dr.Sc., Professor

Personal Information

Birth date: March 23, 1972
Birthplace: Novokuznetsk, Kemerovo Region, Russia
Civil status: Married, four children

Addresses

Office: Skolkovo Institute of Science and Technology
Nobel str. 3, Moscow
143026, RUSSIA
E-mail: a.nasibulin@skoltech.ru

Education

08.07.2011 Doctor of Science (the highest scientific degree in Russia, habilitation) (specialization: Powder Metallurgy and Composite Materials): "Development of technologies of nanoparticle and carbon nanotube synthesis by chemical vapor deposition method" Saint-Petersburg Technical State University, Russia.
06.12.1996 Ph.D. in Physical Chemistry (specialization: Physical Chemistry): "Binary nucleation of supersaturated glycerine vapour in the vicinity of the phase transition lines" Kemerovo State University, Russia.
28.06.1994 M.S. in Chemistry (specialization: Solid State Chemistry): "Kinetic analysis of oscillatory decomposition of silver azide (AgN_3) under photolysis and radiolysis" Kemerovo State University, Russia.

Scientific interests

- Synthesis of nanomaterials such as nanoparticles, carbon nanotubes, graphene structures, metal oxide nanowires by aerosol and substrate CVD synthesis methods.
 - Kinetic and mechanistic investigations of the nanomaterial growth.
 - Applications of electrically conductive, transparent, flexible and stretchable carbon nanotube films in electronics and electrochemical applications (photovoltaic devices, supercapacitors and OLEDs).
-

Professional experience

2014 - present: Professor at Skolkovo Institute of Science and Technology, Moscow, Russia.
2007 - present: Adjunct Professor, Department of Applied Physics, Aalto University School of Science, Espoo, Finland.
2004 - present: Chief Scientist/Consultant (Co-founder. Board member 2004-2009. Technical Advisory Board member), Canatu Ltd. (Spin-off from Helsinki University of Technology), Helsinki, Finland.
2003 - 2014: Deputy Manager of NanoMaterials Group, Senior Research Scientist, Department of Applied Physics, Aalto University School of Science, Espoo, Finland.
2006 - 2011: Academy Research Fellow, Academy of Finland.
1999 - 2002: Senior Research Scientist at Aerosol Technology Group, VTT Chemical Technology (VTT Processes), Finland;
1998: Senior Teacher at Physical Chemistry Department, Kemerovo State University, Russia;

- 1995 - 1998: Senior Researcher (Researcher until 06.12.1996) at Aerosol Nucleation Lab. of the Siberian Branch of the Russian Academy of the Sciences at Kemerovo State University, Russia;
- 1994 - 1997: Post Graduate student at the Kemerovo Scientific Centre of the Siberian Branch of the Russian Academy of Sciences, Russia;
- 1994 - 1995: Junior Research Fellow at Aerosol Lab. of the Kemerovo Scientific Centre of the Siberian Branch of the Russian Academy of Sciences, Russia.
-

Languages

Russian: native language;
Bashkirian: mother tongue;
English: fluent;
Finnish: intermediate knowledge (B1).

Professional activities

An external expert

- Expert of Russian Foundation for Basic Research. Since March, 2016.
- Umnik. Expert. November, since 2015.
- Expert of Skolkovo Foundation. Since September, 2015.
- EU proposals project evaluator for Euro-Mediterranean countries. "ERANETMED Renewable Energies". August, 2015.
- The Estonian Research Council. Project evaluator. Septemebr, 2015.
- Executive Agency for Higher Education, Research, Development and Innovation Funding (www.uefiscdi.gov.ro). Joint Research Projects undertaken by researchers from Romania and EFTA States (Norway, Iceland and Liechtenstein). April-May, 2014.
- The Czech-Norwegian Research Programme (CZ09) in the framework of Bilateral Research Cooperation. April-May, 2014.
- Academia Europaea Prizes for Young Russian Scientists, evaluator. June 2013.
- U.S. Department of Energy, Office of Science, project evaluator, June 2013.
- Norwegian-Estonian Research Cooperation Programme. Project evaluator, May-July, 2013.
- Kemerovo State University for examination of the project "Development of innovative infrastructure at universities", \$5.000.000 project June, 2011.
- Estonian Science Foundation. Project evaluator, November, 2007.

An official opponent of a PhD dissertation:

- 2012, January 29: Jevgeni Šulga. "Self-assembly and interaction of nanostructures". Institute of Physics, University of Tartu. Estonia.
- 2015, February 24: Vladislav Kondrashov "Synthesis of graphene structures as self-aligned elements in micro- and nanoelectronics". National Research University of Electronic Technology, Zelenograd, Russia.
- 2015, June 25: Jhih-Fong Lin "Multi-dimensional carbonaceous composites for electrode applications". University of Oulu.
- 2016, January 27: Dmitry V. Krasnikov "Active center formation in catalyst for the sythesis of multiwalled carbon nanotube with cotrolled properties". Boreskov Institute of Catalysts of Siberain Branch of Russian Academy of Sciences.
- 2016, October 21: Sergey A. Urvanov "Modification of carbon fiber surface by carbon nanostructures". Moscow State Univeristy. Chemical Department.
- 2016, December 8: Muratov, Dmitry S. "Development of methods for the creation and study of the characteristics of functional polymer coatings on the surface of oxide and nitride nanoparticles" Tambov State polytechnical Univeristy. Tambov, Russia.

- 2016, December 8: Fedorov, Irog V.: "Research and development of photoelectric detection devices based on supramolecular self-assembled structures of cyanine dyes" National Research University of Electronic Technology, Zelenograd, Russia.
- 2016, December 21: Andrey Orekhov "Electron Microscopy Study of Structural Peculiarities of Carbon Materials" University of Eastern Finland, Joensuu, Finland.

An external pre-examiner of PhD dissertations:

- 2007: Helmi Keskinen "Synthesis of nanoparticles and preparation of deposits by liquid flamme spray" for the degree of Doctor of Technology at Tampere Univeristy of Technology;
- 2010: Antti Tolvanen " Atomic scale engineering of carbon nanotubes", for the PhD degree at the Department of Physics, University of Helsinki.
- 2013: Manoko Maubane "Nickel and copper catalysed synthesis of novel carbon fibers". University of the Witwatersrand, Johannesburg, South Africa.
- 2015: Anne-Riikka Rautio "On the stability of carbon nanotube and titania nanowire based catalyst materials: from synthesis to applications". Oulu University. Finland.
- 2015: Jarno Ruusunen "Studies of nanoparticle synthesis and physico-chemical properties of aerosols", Faculty of Science and Forestry. University of Eastern, Finland.
- 2016: Tommi Isoniemi "Optical Properties of Conductive Carbon-Based Nanomaterials". Faculty of Mathematics and Science of the University of Jyväskylä.
- 2017: Sami Sainio "Carbon based hybrid nanomaterials for electrochemical detection of neurotransmitters". Aalto Univeristy Electrical Engineering School.

A chairman of National Committee of NT13: Fourteenth International Conference on the Science and Application of Nanotubes. Aalto University, Espoo, Finland, June 24-28, 2013. (450 participants).

A co-chairman of the 2nd Nanocarbon Composites Symposium (NCC2013): Aalto University and Tallinn University of Technology, Tallinn, Finland, June 29-30, 2013. (around 150 participants).

A chairman of 14th International Workshop on New Approaches to High-Tech: Nano-Design, Technology, Computer Simulations (NDTCS-2011) August 22-26, 2011, Espoo, Finland. (65 participants).

A visiting editor of journal *Materials Physics and Mechanics* to publish selected scientific papers of 14th International Workshop on New Approaches to High-Tech: Nano-Design, Technology, Computer Simulations (NDTCS-2011).

Supervision of PhD dissertations

Supervisor/instructor for 10 PhD and 5 MS theses, 14 BS thesis and 8 mini M.S. theses (special assignment) in Physics. At the moment I supervise 4 PhD students.

Awards

- September, 2011: *Smoluchowski award* for the contribution to field of "Aerosol synthesis and mechanistic investigations of carbon nanotubes" at European Aerosol Conference in Manchester, UK.
- September, 2010: FAAR (Finnish Association for Aerosol Research) awarded for Excellent work in Aerosol Science at International Aerosol Conference in Helsinki, Finland.

Activities

- Self-defence, Kwan Nyom HapKiDo (Korean Martial Art):
May 9, 2009: black belt 1st degree,
April 3, 2011: black belt 2nd degree.

Conference presentations and seminars

The results of the scientific research were personally presented mainly orally at many International Conferences, Symposiums, and Congresses: 2 plenary presentations, 3 tutorial lectures, 26 invited talks,

37 oral presentations and 43 seminars at various universities and institutions. As a chairman, was invited to lead many different sessions at various conferences.

Publication summary

Co-author of more than 210 peer-reviewed publications in scientific journals including *Nature Nanotechnology* (2), *Nature Communications* (1), *Nano Letters* (4), *ACS Nano* (4), *Angewandte Chemie* (3), *Advanced Materials* (1), *Journal of American Chemical Society* (3), *Scientific reports* (1), *Physics Review Letters* (1), *Nano Research* (6), *Small* (2), *Chemistry of Materials* and others. 20 patent applications have been filed on. Co-author of more than 260 unrefereed publications and conference proceedings and abstracts.

[Google scholar](#): H-index 39; citations 6245. [Scopus](#): H-index: 34 (accessed on the 6th of January, 2017).

LIST OF PUBLICATIONS:

Articles in refereed journals:

1. M. P. Anisimov, A. G. Nasibulin, and S. D. Shandakov (1996) Nucleation of a glycerine supersaturated vapour in a vicinity of a melting point. *Atmospheric and Oceanic Optics*. **9**(6), 548-554.
2. M. P. Anisimov, A. G. Nasibulin, S. D. Shandakov, I. I. Shvets, L. V. Timoshina (1996) Folds of the nucleation rate surface illustrated with the n-pentanol – argon system. *Atmospheric and Oceanic Optics*. **9**(12), 997-1004.
3. M. P. Anisimov, S. D. Shandakov, I. I. Shvets, A. G. Nasibulin, and L. V. Timoshina (1997) Nucleation in a system of n-pentanol-sulphur hexafluoride as an example of nonequilibrium phase transition. *Atmospheric and Oceanic Optics*. **10**(1), 1-4.
4. M. P. Anisimov, A. G. Nasibulin, L. V. Timoshina (1997) Empirical determination of the critical nuclei composition in the vicinity of glycerin melting point. *Atmospheric and Oceanic Optics*. **10**(2), 84-88.
5. M. P. Anisimov, A. G. Nasibulin, L. V. Timoshina (1997) Binary nucleation in a system glycerine - sulphur hexafluoride in the vicinity of line of phase transitions. *Colloid Journal*. **59**(4), 450-459.
6. M. P. Anisimov and A. G. Nasibulin (1997) Binary Nucleation in the Vicinity of the Critical Line of the Dibutyl Phthalate–Sulfur Hexafluoride Model System *Doklady Earth Sciences*, **356**(1–4), 1061-1063.
